

RiskVision AI — Predictive Risk OS

Repository Risk Prediction Report — Generated: 2026-08-15 03:34 UTC

1. Executive Prediction Summary

Prediction ID	a2e5ed06-5019-42b4-9d4c-b5422419522a	Risk Level	CRITICAL RISK
Failure Probability	79.8%	Risk Score	80 / 100
AI Confidence	59.7%	Health Score	20.2 / 100
Model Version	xgboost-v2.4	Prediction Status	COMPLETED
Triggered By	vetri5678@users.noreply.github.com	Predicted At	2026-08-15 08:51:09.137327

2. Repository Metadata

Repository Name	my-code-in-java	Repository ID	f5f73d66-7b32-4626-864d-9c8a95507644
Git Provider	GITHUB	Branch	main
Visibility	PUBLIC	Language	N/A
Organization / Owner	vetri5678	Repository URL	https://github.com/vetri5678/my-code-in-java

3. Repository Performance Metrics

Metric Name	Value	Metric Name	Value
Total Commits	0	Commit Frequency	0.00/wk
Contributors	0	Active Contributors	0
Open Issues	0	Closed Issues	0
Pull Requests	0	Merged PRs	0
Code Coverage	75.0%	Technical Debt Ratio	5.0%
Build Success Rate	90.0%	Bus Factor Strength	1
Inactive Period	242 days	Code Churn Velocity	1.0

4. SHAP Feature Importance & Explainability

Feature Name	Impact Value	Risk Direction
Technical Debt	-3.0778	Decreasing Risk
Critical Bugs	0.9223	Increasing Risk
Actual Cost	0.7821	Increasing Risk
Project Budget	-0.7481	Decreasing Risk
Schedule Delay	0.5259	Increasing Risk

5. Strategic AI Recommendations

1. ■ P1 — Resume Regular Development Cadence (Priority: P1 — High)

- **Action:** Establish a regular commit cadence and assign active ownership of this codebase.
- **Rationale:** Long periods without commits indicate project stagnation or lack of ownership.

2. ■ P1 — Increase Automated Test Coverage (Priority: P1 — High)

- **Action:** Add unit and integration tests targeting core functional pathways.
- **Rationale:** Low test coverage increases regression risk and makes refactoring unsafe.
