

RiskVision AI — Predictive Risk OS

Repository Risk Prediction Report — Generated: 2026-08-14 09:02 UTC

1. Executive Prediction Summary

Prediction ID	88aa2e5b-ea3d-47a1-9f62-063d92b57061	Risk Level	CRITICAL RISK
Failure Probability	81.3%	Risk Score	81 / 100
AI Confidence	62.7%	Health Score	18.6 / 100
Model Version	xgboost-v2.4	Prediction Status	COMPLETED
Triggered By	admin@riskvision.ai	Predicted At	2026-08-14 14:32:36.183619

2. Repository Metadata

Repository Name	riskprediction-ai-	Repository ID	d7d26b96-5c2b-45fc-8b1a-5d565d4c0c00
Git Provider	GITHUB	Branch	main
Visibility	PRIVATE	Language	Java
Organization / Owner	vetri5678	Repository URL	https://github.com/vetri5678/riskprediction-

3. Repository Performance Metrics

Metric Name	Value	Metric Name	Value
Total Commits	4	Commit Frequency	0.13/wk
Contributors	1	Active Contributors	1
Open Issues	0	Closed Issues	0
Pull Requests	0	Merged PRs	0
Code Coverage	75.0%	Technical Debt Ratio	5.0%
Build Success Rate	90.0%	Bus Factor Strength	1
Inactive Period	11 days	Code Churn Velocity	1.0

4. SHAP Feature Importance & Explainability

Feature Name	Impact Value	Risk Direction
Technical Debt	-3.0670	Decreasing Risk
Critical Bugs	0.9106	Increasing Risk
Actual Cost	0.7791	Increasing Risk
Project Budget	-0.7456	Decreasing Risk
Schedule Delay	0.5264	Increasing Risk

5. Strategic AI Recommendations

1. ■ P1 — Increase Automated Test Coverage (Priority: P1 — High)

- **Action:** Add unit and integration tests targeting core functional pathways.
- **Rationale:** Low test coverage increases regression risk and makes refactoring unsafe.
